Figure 1 shows a graph of α versus s . The x-axis is labeled s and the y-axis is labeled α . A solid line represents the dependence of α on s , starting from the origin and increasing. A dashed line is also shown, starting from the origin and increasing more steeply. The graph is divided into two regions by a vertical line at $s = 134$. The region to the left of $s = 134$ is labeled 'TM' and the region to the right is labeled 'TE'. The values of α at $s = 134$ are 298,106.34 for TM and 356,112.37 for TE. The values of α at $s = 381,354.54$ are 381,354.54 for TM and 385,347.11 for TE.
